

# Chapter tracker 39

## sec. 1

- C1 - How + Why our climate is changing
- C2 - What is climate justice?
- C3 - Where are green house gasses coming from?
- C4 - Climate myths Facts
- C5 - Averting climate collapse
- C6 - identity + privilege
- C7 - Climate stories

■ C8 - crises under the radar

■ C9 - Capitalism

■ C10 - Corporations

■ C11 - housing + Migration

## sec. 2

■ C12 - resist fossil fuels

■ C13 - individual Action

■ C14 - Build resiliency + Community

■ C15 - Disaster response gone wrong

■ C16 - Building New

■ Conclusion - What will save the planet

"We work in solidarity, together!"

57

"Moving away from a individualistic mindset to a collective-centered one is one of the most powerful steps we can take to build climate resilience in our communities."

128+129 What does community climate resilience look like?

1) get to know your neighbors.

- build relationships with people in your community.
- Community asset mapping.  
"work with community to identify skills, resources, material supplies, and vulnerabilities." to support your community in day-to-day and longer term.
- Building close relationships with your community will help when stuff goes wrong.
- Building community help. climate change + its effects.
- Building systems that focus on community care + human dignity.

- "the human failures in our <sup>current</sup> system are often what turns these disasters ~~into~~ moments in to tragedies"

134  
+  
135

CIS Disaster response gone wrong

Charity  
- trying to help after a disaster in certain places often doesn't help unless you know the community + there needs really well.  
ex: Donating tons to build something that might not be what the community actually needs.

Mutual Aid = gives ~~the~~ the power to the people who are affected + vulnerable to have them decide what is the best way to use the money for themselves.

"Mutual Aid is about solidarity!"

Disaster Capitalism

- Corporations take advantage of Disasters to earn more Money.
- "Seek Profit from Demand"

Build interdependence

- allows people to go further with support from their community.
- focused on success for people + their community.

142 | C16 Building New

143

fact: the wealth gap is 25% larger between the richest and poorest countries than it would be with out C.C.

2019 Study: temp change has helped countries in the global north but have harmed economic growth in the global south.

- Small groups of people have a lot of power across the globe, they decide what our future looks like.
- with out consumers those ~~the~~ people don't have power, it comes back to the communities.

146+147

- Money get passed around usually, going from one place to another, building the economy

• but when wealth holders have it that doesn't happen, (they keep it)

• Most people become poorer due to that money not being passed around.

148+149

- Cooperatives (co-ops) - owned <sup>run</sup> by the community.
- Democratically run by community

150+151

Conclusion

- what will save the planet?

→ on the back

Not hoarding Money/profit, instead circulating it through the community.

Using natural resources at a ~~slow~~ pace that doesn't overtake what the planet is able to produce

Creating/changing methods of production that depend on recycling + reusing goods.

"Putting workers at center of Decision Making + Profit Sharing"

"Let's Build a new world to meet people's basic human needs"

if we look around, and bring every one to the table, we might find we already have all the answers."

### activity

- support the right people. look into who I am supporting
- reuse stuff and buy less stuff that I don't need
- switch who we are supporting + what products where buying.
- support local economy + community
- help others who might not be able to
