

Tropical Cyclones in Madagascar

What?

Madagascar was hit by 3 cyclones in a year. Cyclone Freddy hit just weeks after cyclone Cheneso hit.

Cyclone Freddy made landfall in

late February of 2023, reaching winds of 180km per hour and waves up to about 8 meters tall. The effect on Madagascar has been extreme. 5,000 houses were destroyed, 11,000 people were displaced, and 5 people died in the storms.

Les gens au Madagascar ne mangent pas assez parce que l'orage. Ils n'ont pas assez de nourriture pour leur famille et les gens du village. Ils n'ont nulle part où vivre et ils ne peuvent pas là. L'orage avait affecté Madagascar beaucoup et la récupération continue.

Where?

Cyclone Freddy hit the eastern coast of Madagascar. These storms have had a huge impact on all of Madagascar, specifically the eastern coast and the Southeastern part, including the city of Mananjary.
